

# Prepare Today to Meet the Complex Challenges of Tomorrow

Healthcare Security, Consulting and Compliance by NTT DATA

Our consultants can help you align your strategy and tactics with your mission and business goals, preparing your organization for the future.

As payers move aggressively toward outcome-based reimbursement and away from fee-for-service payments, hospitals, physicians and health systems need to remodel their operations to focus on affordable, effective and accessible care. To do this, you need new strategies to become more cost efficient and collaborative with other providers, and to meet the security challenges of widening access to your systems and data. At the same time, your organization must be able to adapt to evolving regulatory requirements and the need for integration in the wake of mergers and acquisitions.

New technology, such as telemedicine, social media listening and engagement, and precision medicine and genomics, can help meet these challenges if your organization has the right structure in place to use them effectively.

To succeed, you must find new ways to efficiently manage people, processes and technology to deliver excellent patient care and maintain financial stability.

Healthcare Security, Consulting and Compliance by NTT DATA can help you design successful strategies and tactical plans that are fully aligned with your mission and business goals. We can help you create governance structures that ensure effective use of data and technology; strategic plans that can decrease your IT costs, boost your overall efficiency, productivity and institutional effectiveness; and collaboration tactics that enhance access and increase data security. Our consulting services include:

- Strategic planning, governance and compliance
- Healthcare security
- Business integration and IT rationalization
- Enterprise information architecture
- Project and IT leadership

#### Key benefits:

- Simplify and optimize your technology systems
- Minimize risk and reduce costs of designing, implementing and managing your improved IT infrastructure
- Gain actionable insights with a spectrum-wide view that encompasses strategies, principles, issues, regulations and events
- Obtain integrated access to a comprehensive array of NTT DATA services and solutions
- Enhance information security
- Improve efficiency of data exchange with regulatory entities
