

## Transform Your Data Center to Control Costs, Improve Availability and Increase Operational Efficiency

NTT DATA Managed Data Center Services

### Shift your focus from infrastructure to business

Managing your IT in the digital and cloud era is complex. Add the convergence of business and IT, and the result is maxed-out IT resources that are unable to get it all done. Budgets are shrinking, complexity is rampant and demands are growing faster than IT leaders can plan, manage and execute with traditional solutions.

Meet these increasing demands by teaming up with NTT DATA Services. Our portfolio of people, processes and technology helps you to do more with solutions that utilize our end-to-end

capabilities. Many of our services are widely recognized by industry leaders and analysts as some of the best capabilities in the market.

No matter the size of your organization, our team provides a consistent and exceptional customer-centric experience. Through our comprehensive portfolio of transformational outsourcing services and global capabilities, we deliver solutions designed to meet your needs and make your IT a true business enabler.

Trust NTT DATA to help you reduce complexity, improve productivity and collaboration, and enable intelligent data centers.

## Transform your data-center infrastructure

Start your infrastructure transformation journey toward an as-a-service model with support from NTT DATA experts. We provide managed services focused on enabling intelligent data centers, with a tangible target of reducing business-process cycle times and improving productivity through faster data processing, flexibility and elasticity.

We can:

- Optimize your daily operations
- Consolidate data centers
- Simplify, virtualize, automate and orchestrate your storage, network and server environments
- Enable seamless connectivity and usability of private, public and hybrid clouds

### Platform Management and Cloud Services by NTT DATA

Our services are focused on delivering the right capabilities in response to your specific challenges and goals, covering the complete range of operating systems and infrastructure components, from Wintel, virtualization, UNIX and Linux to large systems and public, private and hybrid clouds. Our highly flexible approach in managing the platform and infrastructure environment, combined with our deep global experience, enables you to:

- Optimize and consolidate servers, workloads and applications to increase uptime, maximize space, and reduce power, cooling and operational costs
- Take advantage of our best-in-class automation and orchestration framework, methodology and comprehensive toolsets to build a fully business-aligned server and computing infrastructure

### Storage, Protection and Management Services by NTT DATA

Organizations such as yours are finding it difficult to support continuously growing

data and complex underlying storage and data management systems. Our services, together with our unique storage and data management strategy, allow you to manage data growth while ensuring it remains secure, compliant and available. We help you optimize the way data is stored, protected, managed and made available in your environment.

Our portfolio includes managed transformational services for multi-vendor storage and data protection systems, which also enables a seamless migration to a cloud and utility model within our data centers. We help you:

- Consolidate, virtualize, automate and orchestrate your storage and data protection infrastructure to increase availability, maximize usability and reduce maintenance costs
- Craft and execute your data storage and protection environment strategy in support of a digital-enabled business

### Enterprise Database Management Services by NTT DATA

Data availability and usability represent a critical factor in business growth and success, and enable you to proactively respond to market trends and changes. Our services focus on increasing the responsiveness and availability of your IBM DB2, Informix, Microsoft SQL Server, MySQL, Oracle and SAP/Sybase platforms. We partner with you to transform your database management model through:

- A legacy of industry-leading tools and practices

- A rich catalog of database management services
- Efficiencies realized from a real-time global delivery model

### Disaster Recovery and Business Continuity Services by NTT DATA

Reducing the risk of downtime and data loss in the event of a disaster through fully resilient and available business-aligned IT services represents a critical factor for the success of your business. We provide complete disaster recovery solutions to protect the integrity and availability of your critical systems and data that help you:

- Minimize and eliminate the risk of a catastrophic data loss — and the subsequent disruption
- Design and implement a comprehensive data protection policy that meets your compliance requirements
- Optimize spending on disaster recovery while making sure your organization is prepared for the worst

### Enterprise Network Services by NTT DATA

Enterprise Network Services are designed to enable a converged and IT service-centric data center in support of your business. We help reduce your network complexity and costs, increase access to applications, enable internal and external collaboration, and convert your disconnected network environment into a single, integrated one. From core to access, and from end user to the data center, we bring in the right technologies to:

- Virtualize your network environment and allow quick provisioning, high reliability and availability
- Orchestrate, automate and enable a modular and heterogeneous environment that is flexible and adaptable to your business demands

## Data Center Security Services by NTT DATA

In a digital business era where security breaches are prevalent and incident response is a growing concern, our security services protect the integrity, confidentiality and availability of your data and environment. Our network security, information security management, and security and endpoint administration services allow you to:

- Be completely protected against internal and external threats

- Improve compliance while saving time and resources and gain a competitive advantage in both brand value and reputation

## Data Center Hosting and Operations Services by NTT DATA

The demand for cost and risk reduction, coupled with the need to focus on core business and cloud enablement, has become a driver for IT transformation. Let us handle your day-to-day IT operations to increase system reliability and

availability while reducing your operation support costs. We implement on-site and remote management options for your data-center facilities to reduce the total cost of operations, or we can offer hosting services within our secure, highly available technology centers for all your infrastructure equipment. We offer a variety of space options to enable flexibility for all environment types and sizes, augmented with a comprehensive set of operational services.

## Get the support you need

Designed to meet the needs of your business, NTT DATA Managed Data Center Services provide complete end-to-end, outcome-based, transformational support to accelerate your business growth. We provide you with a flexible delivery model tailored to maximize results, drive efficiencies, reduce risk and provide immediate time to value.

### Flexible services designed by you

**Comprehensive skill set:** Gain access to skilled professionals, on-site or remote, when and where you need

them to fast-track your IT projects and transform your IT into a business-aligned function. We work with you to ensure you optimize your investment in technologies and services to achieve a data-center environment designed for agility, efficiency and quality demands.

### Transformational service delivery framework:

Our IT Infrastructure Library-aligned delivery methodology is integrated with a patented transformation framework and supported by comprehensive toolsets to efficiently help

you manage your enterprise-class data-center environments, and enable you to utilize and integrate the right technology and capability at the right time — with clear and measurable business outcomes.

**Value co-creation:** We partner with you to create solutions and services that are aligned with your business strategy, and to seamlessly integrate capabilities and technologies in support of your journey toward a digital-enabled business.

Managed Data Center Services footprint

# Enable your data center with best-in-class services

Delivering expert guidance and support from concept to completion, we are uniquely equipped to strategize and enable your infrastructure to scale on demand while reducing cost and complexity.

While our best-in-class solutions help you maximize IT efficiency and increase productivity, we work with you to create a seamless path to a data-center-as-a-service model that utilizes a mix of cloud, traditional and hybrid solutions.

## Begin your journey today

It's time to unleash your data center to drive results. And as you evolve

your organization to make the most of managed services, look to us for help. Take advantage of our tools, expertise and global delivery framework to integrate and optimize managed services that provide business-aligned, secure solutions for today and tomorrow spanning traditional, hybrid and cloud environments — helping you foster innovation, drive growth and enable transformation.
