Effectively Manage, Control and Protect Your Organization's Software Assets

Software Asset Lifecycle Management Services by NTT DATA

Improve management of your software assets to meet changing IT needs

Software asset lifecycle management is critical to managing your IT environment because effectiveness is seriously compromised when your organization does not know what software assets it has, where they are located, how they are configured and how they are used and by whom. The implementation of many processes, such as configuration, release and change management, is dependent on your organization having accurate knowledge of its IT assets.

The fast pace of technology innovation will continue to present new challenges to achieving effective software management. Software Asset Lifecycle Management Services by NTT DATA prepare you for the challenge. Our services help you optimize assets throughout their lifecycle to help you reduce cost, improve compliance and mitigate risk. We can help you:

- Solve compliance issues by:
  - » Implementing chain-of-custody processes
  - » Complying with the Sarbanes-Oxley Act, HIPAA, and other retention and data privacy regulations
  - » Enabling software licensing compliance
- Improve cost reduction and avoidance by:
  - » Maximizing the utilization of assets and redeploying them, if possible
  - » Enabling efficient procurement, contract negotiations and chargeback
- Mitigate risk by:
  - » Tracing asset usage and ownership
  - » Defining processes and make records available in the event of an audit

In a nutshell, our services provide solutions for inventory control and management, financial planning and the management of procurement, software, contracts and changes.

Software Asset Lifecycle Management Services by NTT DATA help:

- Provide insight into software platforms usage and ownership
- Deliver support for industry compliance audits and enable efficient procurement and contract negotiations
- Reduce IT costs associated with new license purchases and renewals
- Increase automation and standardization while decreasing annual technology costs
- Maximize the utilization of assets and redeploy, if possible
- Cut the time and effort required for software-specific audits

Accelerate your move to software asset lifecycle management

Our services support your business objectives using industry best practice to optimize assets throughout the lifecycle and help you reduce cost, improve compliance and mitigate risks. We offer two major services for Software Asset Lifecycle Management:

- Client Software Asset Lifecycle Management focuses on end-user software
- Data Center Software Asset Lifecycle Management delivers services for enterprise and data center software components

Key aspects of the offering

Features	Benefits
Client Software Asset Lifecycle Management	It includes: • Deployed software against license count tracking • Simple desktop licensing (Microsoft, Adobe) • Upgrade and downgrade rights • Support and maintenance agreements
Data Center Software Asset Lifecycle Management	It includes: • Deployed software against license count tracking • Complex data-center licensing (Microsoft, Symantec)
Flexera FlexNet agent deployment support	Add-on support service to manage Flexera FlexNet platform deployments for end-user and data center endpoints
License optimization	Add-on service: • License model optimizations for production versus development • Version/edition cross-usage analysis • Version/edition standardization analysis What-if analysis reports are also included in Data Center Software Asset Lifecycle Management
Software metering and harvesting	Add-on service for Client Software Asset Lifecycle Management and Data Center Software Asset Lifecycle Management
Oracle license management	Only available for Data Center Software Asset Lifecycle Management: software asset management for Oracle licensing
IBM license management	Only available for Data Center Software Asset Lifecycle Management: software asset management for IBM licensing
SAP license management	Only available for Data Center Software Asset Lifecycle Management: software asset management for SAP licensing
