

NTT DATA State and Local Services

Improve Performance. Increase Flexibility. Reduce Costs.

Let NTT DATA help your agency focus IT on what matters:
Serving the public effectively and at a reasonable cost.

Better IT. Better Government. More Power to Serve the Public...

Advisory Services

NTT DATA's Advisory Services helps get your people and your technology in sync, efficiently achieving targeted goals and sustainable mission outcomes.

IT Strategy and Planning – NTT DATA can help you assess and rationalize your IT portfolio, develop your enterprise architecture, and create IT strategic plans. We can help decide if and when to modernize an existing system, then show you how to go about it.

Program Management – NTT DATA can help your agency manage the development or modernization of large, complex systems to make sure they benefit your organization at both strategic and tactical levels.

Independent Verification and Validation (IV&V) – NTT DATA's IV&V services can help make sure that the complex systems under development at your agency include all required features, meet all standards, and are completed on schedule and within budget. NTT DATA's IV&V services can also identify errors early while reducing risks.

Agile Consulting – We help you move beyond the hype and promise of Agile. NTT DATA's Agile experts deliver training, guidance, and leadership in developing and implementing an Agile strategy.

Digital and Application Services

NTT DATA can help you quickly implement new systems and infrastructure, update or maintain legacy systems, or take advantage of new cloud and mobile technologies with an emphasis on user experience.

Application Modernization – NTT DATA puts innovation to work by transforming public sector legacy systems using automated tools, modern programming languages, software libraries, and the right hardware. With better IT, your agency will be better able to flex to constituent and legislative demands.

Application Management – NTT DATA can help reduce your total cost of systems ownership through lower application management costs, greater operational efficiencies and a better alignment of IT and business needs.

Enterprise Application Services – Let NTT DATA help your agency implement and maintain an enterprise application suite from market leaders such as SAP, Oracle, Salesforce.com and Micropact.

Data and Analytics Services

NTT DATA can help drive effective decision making and mission support through efficient collection, storage, management, analysis, and dissemination of data.

Information Management – NTT DATA can assess present and future information needs throughout your organization, then design an agency-wide information architecture, with proper governance, that ensures stakeholders have the information they need, when they need it.

Business Intelligence – Increase productivity and adapt to changing conditions through collaborative BI, mobile BI, dashboards, scorecards, and new ways of visualizing your data.

Big Data and Analytics – NTT DATA can help organize unconventional sources of data (such as social media, email, sensors, even photography), then mine them to uncover new insights. Take advantage of the latest trends in Big Data analytics, data mining, predictive analytics, and social analytics.

Cloud and Infrastructure Services

NTT DATA can help you develop your cloud and infrastructure strategy, host and optimize management of your IT infrastructure to give you the flexibility to rapidly embrace change and growth.

Advisory – NTT DATA can help you strategize, plan and architect your cloud and infrastructure transformation with vendor-agnostic assessments and the resources to chart your route.

Hosting – NTT DATA provides government agencies with a secured and highly available cloud hosting environment with enterprise-class features for a wide variety of applications.

Management – NTT DATA can operate, maintain, and evolve your IT infrastructure through a comprehensive array of cloud infrastructure support services. We help you adopt and manage public, private or hybrid clouds.

End User Computing – NTT DATA can help you address changing agency workplace demands with anywhere, anytime unified communications and seamless migration and management of end-user computers and devices to boost productivity, reduce costs and keep employees connected.

Disaster Recovery – NTT DATA's cloud-based disaster recovery services for cloud or traditional infrastructure provides a consumption-based pricing model where you only pay for the compute and memory resources you actually use during an event.

Security Services

NTT DATA can protect information assets against cybersecurity threats and help organizations comply with changing security laws and guidelines.

Advisory – NTT DATA can advise you on the best strategies for securing your systems, and then help you better align your organization's information security and risk management efforts with your overall strategic goals.

Managed Security – Our managed security services provide daily security operations management and are designed to deliver active threat management across networks, both on-premises and in the cloud.

Helping Government Agencies of All Kinds Address Critical Challenges

NTT DATA helps state and local organizations address critical challenges across criminal justice and public safety, education, health and human services, finance and commerce, environment and natural resources, and transportation domains.

MA Department of Revenue:
