**Ready for the Blockchain Revolution?**

**Is blockchain right for your business?**

- A single version of truth
- Secured transfer of value
- Disintermediation of trust
- Increased transparency
- Cost savings

With blockchain, your enterprise can:

- Enable secure, authenticated transactions
- Streamline processes, and improve efficiency and process transparency
- Reduce operational costs and risk due to single points of failure

**NTT DATA can help**

As an early adopter of blockchain, NTT DATA has the expertise to help your organization determine if blockchain is right for you:

- Recognized as 'Leader' in Enterprise Blockchain Services by Avasant Radar View Report 2018
- 4 innovation labs foster technology evaluation (U.S., Japan, Germany and Spain)
- More than 70 use cases in flight across industries
- Founding member of the Hyperledger project, which promotes blockchain technology for enterprise use
- Member of blockchain-focused consortiums, such as the Enterprise Ethereum Alliance, R3 Corda and Ripple
- Contributer to the Hyperledger Quilt (Interledger Protocol) and Hyperledger Iroha (reusable assets) frameworks

**Gartner says Blockchain’s business value-add will grow to slightly over $360 billion by 2026, then surge to more than $3.1 trillion by 2030.**

Blockchain has been the No. 1 search term on gartner.com since January 2017.
