

NTT DATA Managed Security and Security Consulting Services

Protect Your Information Assets

NTT DATA's comprehensive security services offer government organizations a powerful defense against the threat of a serious, public security. NTT DATA can help you protect critical constituent data while complying with changing security laws and guidelines.

The Challenge: Finding the Balance Between Risk and Cost

Throughout the world, a rapidly evolving digital landscape is raising new questions about cybersecurity for government organizations and their IT administrators. They are finding it a challenge to fully secure systems, prevent breaches, and comply with the latest security standards. Many agencies are also shifting to a hybrid IT model with a combination of on-premise and cloud-based services. This has added complexity to the challenge of securing key systems and networks by creating more possible lines of attack. Agencies also face:

- » Increasingly distributed and often mobile digital workplaces
- » Increasingly stringent industry security standards
- » A worldwide shortage of skilled security engineers
- » Incompatible or poorly integrated hardware and software

NTT DATA addresses these challenges using our Full Security Life Cycle approach. Through this comprehensive security approach, NTT DATA integrates advisory services, managed security services, and technology services into one seamless portfolio. We can advise you on the best strategies for securing your systems, and then help you better align your organization's information security and risk management efforts with your overall strategic goals. Our services provide daily security operations management and proactively address threats.

The Power of a Global IT Leader

NTT DATA is part of one of the world's largest IT and telecommunications companies. We offer a broad spectrum of information security and risk management services that free up the organizations we serve to focus on their core missions while our security experts manage the IT security risks.

Part of what sets us apart is our broad-based view of cybersecurity challenges. We offer insights based on our work with more than 10,000 clients worldwide and gained from our 7 research and development centers. Given this breadth, we are better able to consider the big picture — including your organization's overall IT roadmap— when helping to prioritize security projects and drive stronger standards.

Our Full Security Life Cycle approach incorporates proven methods for identifying, evaluating, and protecting information assets, and includes services such as:

- » Security Consulting Services, including advanced, persistent threat simulation; risk insight and active risk management; enterprise security; technical assessments; offensive security; and governance, risk, and compliance assessments.
- » Managed Security Services, including log monitoring and management; managed SIEM security device management; vulnerability management; secured cloud, enterprise, and mobility security enrichment; next-generation firewall support; and technical support services.

Security Expertise

NTT DATA is part of the NTT Group, a Fortune Global 100 company and one of the world's largest IT and telecommunications companies. NTT's security expertise stems from:

10 SOCs
and 7 R&D Centers

1,500
Security Experts and
Researchers Working Globally

10,000+
Customers Worldwide

167,000+
Devices Monitored,
Managed, Secured

6.2 Billion+
Attacks Detected and
Defended Against Each Year

3.5 Trillion
Logs Analyzed Annually

THINK SMART. ACT FAST. FLEX YOUR BUSINESS.

- » Onsite Support, including advanced security operations, comprehensive assessments, and security implementations.
- » Incident Response, including critical incident response planning, forensics, and malware analysis.

Our managed security services are designed to deliver active threat management across networks, both on-premises and in the cloud. Our unique analysis engines can spot trends that others cannot by distilling threat intelligence from operations across the globe, and then creating new signatures and feeds to combat emerging threats. Delivery options include a complete managed security service model, as well as SecureCall, a round-the-clock telephone and email support service that can serve as an extension of your own IT security support team. In these and other ways, we can meet your organization's evolving needs.

A Partner for Comprehensive Cybersecurity Protection

IT is evolving quickly, and the consequences of security failures can be severe. Government organizations may face an enormous loss in public confidence, significant remediation costs, and even a loss of funding because of noncompliance with applicable security standards.

Staying ahead of the curve requires a strategy. NTT DATA provides proactive security management, including continuous monitoring and analysis, advanced technology, scalable processes, and security specialists available when you need them—for on-premises solutions, for data centers, and for cloud-based assets.

Let our experienced security consulting team work with you to understand your requirements and to help you define and prioritize the investments and activities that will best protect your information assets. NTT DATA can help your organization better defend against advanced threats and meet evolving information security laws and guidelines.

Why NTT?

- » A Top Global Security Player
- » Loyal Customers
- » Praised by Industry Analysts
- » Award-Winning Security Consultants

Did You Know?

- » Gartner has recognized NTT as a "Challenger" in its 2015 Magic Quadrant of managed security service providers
- » NTT DATA provides cybersecurity expertise to the federal law enforcement community
- » NTT DATA's security experts helped define key standards like FISMA, NIST 800 series, and ISO 27001
- » By working with NTT DATA, a large state agency has built a world-class IT security services program, one that monitors critical systems 24x7 and has developed policies and procedures to quickly meet ever-more rigorous national security standards
